

# Steel Pipes, Fittings & Flanges

Business brochure for fire protection and water treatment product supply.

**One-stop Supply**

**Export Service**

**Project Support**

**Shenzhen Jieling Industries Co., LTD**

**Reliable piping solutions for global customers**

## About Us

### Professional export supply for industrial piping projects

We supply steel pipes, pipe fittings, flanges and related accessories for overseas distributors, contractors and project buyers.

#### Company Profile

Our products are widely applied in fire protection systems, water treatment systems, municipal infrastructure and general industrial piping. We focus on stable quality, practical specifications and responsive export service.

#### Supply Scope

##### What we supply

- Steel pipes
- Pipe fittings
- Flanges
- Valves and accessories

##### What customers value

- Clear specifications
- Flexible order quantities
- Fast quotation response
- Export documentation support

#### One-Stop Procurement

Pipes, fittings and flanges can be supplied together.

#### Project Support

Suitable for package supply and mixed order arrangements.

#### Export Service

OEM marking, packing and shipment documents available.

# Solutions for Fire Protection Systems

Detailed product coverage for sprinkler, hydrant and fire line systems

## Main Products

- Black steel pipe
- Galvanized steel pipe
- Seamless steel pipe
- Grooved fittings
- Threaded fittings
- Flanges and accessories

## Detailed Product Items

- Rigid / flexible couplings
- Grooved elbows, tees, reducers, caps
- Mechanical tees and crosses
- Threaded elbows, tees, unions, couplings
- Slip on, blind and threaded flanges

## Typical Uses

- Fire sprinkler systems
- Fire hydrant systems
- Pump rooms
- Warehouses and commercial buildings
- Industrial fire lines

## Fast Installation

Grooved and threaded connections support efficient site work and easier maintenance.

## Reliable Compatibility

Common sizes and standards help matching with project systems and existing components.

## Package Supply

Steel pipe, fittings and flanges can be combined in one order for cleaner procurement.

# Solutions for Water Treatment Systems

Detailed piping products for water supply, wastewater and process systems

## Steel Pipes

- Carbon steel welded pipe
- Seamless steel pipe
- Galvanized steel pipe
- Stainless steel pipe
- Anti-corrosion pipe

## Fittings and Flanges

- Butt weld elbows, tees and reducers
- Threaded fittings for small-size systems
- Slip on, weld neck and blind flanges
- Stainless steel fittings for corrosive service

## Project Uses

- Water supply networks
- Wastewater treatment plants
- Industrial water pipelines
- Municipal infrastructure
- Pump stations

## Corrosion Resistance

Coated pipe and stainless options are available for demanding water and utility environments.

## Long Service Life

Suitable for buried, exposed and general industrial water systems with stable service life.

## Flexible Material Range

Carbon steel, galvanized and stainless grades can be supplied according to project needs.

# Product Scope

## Main product categories

A concise overview of export-ready products and service support.

Category	Main Range
Steel Pipes	Carbon steel welded pipe, seamless pipe, galvanized pipe, stainless steel pipe and coated pipe.
Pipe Fittings	Grooved fittings, butt weld fittings, threaded fittings, forged fittings and accessory items.
Flanges	Slip on, weld neck, blind, threaded, plate and lap joint flanges.
Service Support	Cutting, beveling, threading, coating, marking, packing and mixed package supply.

### Designed for Export Orders

This range is suitable for general bulk supply, mixed orders and project-based packaging.

### Practical Coverage

The brochure keeps the range concise while leaving space for customized specifications when needed.

## Materials, Standards & Service

### Core technical coverage and export support

#### Materials & Grades

- Carbon steel
- Stainless steel
- Alloy steel
- Galvanized steel

Common grades include  
ASTM A53, ASTM A106, API  
5L, SS304 and SS316L.

#### Common Standards

- Pipes: ASTM A53 / A106 /  
A312 / A795 / API 5L
- Fittings: ASME B16.9 /  
B16.11 / MSS SP series
- Flanges: ASME B16.5 / EN  
1092-1 / JIS

#### Service Options

- Cutting and beveling
- Threading and coating
- OEM marking
- Customized packing
- MTC, CO, packing list and  
inspection support

#### Business Style

This version keeps the layout clean, clear and suitable for customer-facing export use.
